

## **New SOD Report**

We have added one more Schedule of Deliverables (SOD) report for the Referral for Evaluation event. The ***SOD Referral for Evaluation Report*** provides the total number of referrals for evaluation within the date range you specify in the “Referral for Evaluation Date” field on the find screen. Results are broken down by individual county (if applicable).

This is the newest addition to the two previously available SOD reports:

- The ***SOD Referral Report*** provides the total number of referrals (both Referral First Contacts and Referral Ins) within the date range you specify in the “Referral Date” field on the find screen.
- The ***SOD Completed Screenings Report*** provides the total number of completed screenings within the date range you specify in the “Screening Final Result Date” field on the find screen.
